WHAT OUR K9S BRING TO THE UNIT

Through our extensive K9 training and operations in the field, the K9 function in an anti-poaching unit is irreplaceable by man or machine, as we patrol and lie in ambush in some of the most dangerous territories in the world, in pitch darkness.

Our K9s are our eyes, ears, noses, and companions in the bush. The dogs' ability to follow scent, rather than spoor (footprints), allow us to sprint on the follow and release attack dogs on suspects, as conventional tracking methods are too slow. The K9s locate poachers and apprehend the suspects for our Anti-Poaching Unit.

Through this, we have also created a better purpose for the K9s themselves by giving them the opportunity to help protect our Wildlife from extinction.

K9s Highly specialized disciplines include;

- Human tracking
- Rhino tracking
- Contraband Detection training
- Protection training
- Apprehension training

Our preferred choice of operational K9s include;

- Human tracking Belgian Malinois
- Pitbull Terriers
- German Short Haired Pointers
- German Shepherds
- Sable Shepherds
- Rottweiler
- Boerboel
- Cane Corso
